

# J.INKSTER

Inksters have been importing and wholesaling timber and forestry products for three generations – over 70 years, and trading from the current premises since 1976.

J.Inkster (Littlepark) Ltd manufactured garden sheds and fences for many years before moving into Scandinavian log cabins in 2000, quickly becoming the largest supplier on the south coast.

Imported directly from Scandinavia, the Inkster Range is made from high quality Nordic Spruce which is grown in a region of long cold winters and short summers. This brings a slow growth rate to the trees giving a tight grain which is responsible for

the longevity and durability of the timber. Wall logs are cut with wind and rain proof corners. Logs over 28mm thick are double tongued and grooved for warmth and strength.

Roof timbers and floors are all solid T & G timber and foundation joists are pressure treated to help guard against rot.
